THE PRESIDENT'S REPORT

Hello Everyone,

Here we are again at the end of another great year. I want to say thank you to all of the club officers, event coordinators, and all members who were willing to come out and assist. Several of you stepped up and volunteered to help in many different ways. Thank you all for making 2006 a successful year. It would not have gone as well with out you.

There are several new people that have asked to participate and have been confirmed as club officers, thank you for your willingness to serve. To those who are willing to serve yet another term in their existing office, thank you for being willing to continue in your office. To those who are stepping down from an office, thank you for your service.

I want to thank the club for allowing me to serve as president again in 2007. I look forward to another year of fellowship and fun. I enjoy all of the people who form this great club of ours.

Have fun and be safe
Eddie

Next Meeting is:
Tuesday December 26th, 2006 6:45 PM at
the Johnson City Golden Corral

The deadline for next month's newsletter will be January 10, 2006.

From the Editor...

I would like to remind you to take advantage of listing any items you have for sale and feel free to share: photos, tips, ideas, interesting articles, product reviews, up-coming events and any other points of interest. Let the rest of us know what planes that you're currently building. It will take input from all of our members to truly make a worthwhile newsletter. You can contact me by phone, letter, or e-mail.

Thank You
Kenneth McMahon

President:	Eddie Cline
Vice President:	Steve Weller
Secretary:	David Bench
Treasurer:	Vic Koenig
Safety Officer	Don Martin
Field Marshals:	Greg Cowen
	Earl Farrar
	Klaus Kolger
Newsletter Ed:	Ken McMahon
Webmaster:	Scott Kreidler

Safety First !!!!

Ken Detherage spoke to the club during the last meeting regarding his accident. He shared with us how his hand was severely cut by the prop on his plane. He doesn't remember exactly why he was doing it, but knows that it happened while reaching across the front of the plane while the engine was running.

Thanks to Ken for sharing this event with us, and hopefully it will serve to remind us all how quickly this can happen and how much damage can be caused by just a momentary lapse of attention.

Just a Reminder

We as a club should always be looking for new members and find ways to introduce this exciting hobby to others. We need to be inviting people, young and old, to come out to the field and experience the hobby for themselves.

Tip of the Month

While cutting brass pipe for fuel line attachment, it is sometimes nearly impossible to get all the burrs from the cut area. This can and has resulted in tiny holes in the soft fuel lines which in turn causes air leaks into the fuel feed. This can cause the engine to intermittently shut down, usually at the most inconvenient times. One solution to this problem is to apply heat shrink tubing to the cut end of the brass. This will not interfere with the fuel delivery and will cushion any remaining flash on the brass pipe.

(from Tips section of Model Airplane News)

For Builders/Repairers

A really good alternative to wax paper as a glue resist while using CA would be to use one of the transparent kitchen wraps (such as Saran Wrap) or the parchment paper used in baking. Both have their advantages. The clear offers better visibility of whatever lies beneath it, and the parchment paper is much easier to handle. Try both, neither will inadvertently become a permanent part of your plane.

(thanks to Jerry Black for the tip on Parchment)
